PROFILE

Backend and infrastructure engineer with 10+ years of technical experience building resilient architectures, high-concurrency APIs and cloud systems. Expertise in Python, FastAPI, Django and Odoo Community & Enterprise, with a focus on complex integrations, asynchronous processing and reliable containerized services across AWS and GCP.

PROFESSIONAL EXPERIENCE

Backend & Infrastructure Engineer

Qida (home-care) Jun 2025 - Present

- Develop and maintain high-concurrency backend services and core business logic with Python, FastAPI and Odoo Community.
- Optimize asynchronous workers and critical workflows, focusing on reliability, throughput and PostgreSQL performance.
- Build integrations with Holded, HubSpot and third-party APIs for financial and invoicing workflows.
- Support containerized deployments with Doodba and Docker on AWS and GCP.

Full-stack / Backend Engineer

ALOHAS Mar 2024 - Jun 2025

Developed backend services with Python and Django, including Shopify-Odoo integrations and shipping integrations with DHL and other carriers.

Odoo / Backend Developer

Som IT Cooperatiu Jul 2023 - Mar 2024

Developed Odoo modules and Ansible automation for energy self-consumption projects with cooperatives including Som Energia and Som Comunitat.

Full Stack Developer

GlobalUY May 2022 - Jul 2023

Worked on a Django ecommerce project for shapermint.com, focusing on the checkout page.

Full Stack Developer

Allaria Ledesma & Cía. Jun 2020 - Jul 2023

Developed applications with Odoo and, subsequently, Django and Vue.js.

TECHNICAL SKILLS

Backend: Python, FastAPI, Django REST Framework, Odoo Community & Enterprise

Data & async: PostgreSQL, Redis, queue-job

Infrastructure: Doodba, Docker, AWS, GCP, Linux, Nginx, Ansible, CI/CD

Integrations: Holded API, HubSpot API, Shopify, DHL, third-party APIs
